TECHNICAL SKILLS

- Data Science & Machine Learning: Predictive Modeling, Regression/Classification, Clustering, web scrapping, Feature Engineering, Model Evaluation, Deployment Fundamentals.
- LLM Engineering & AI Tools: Prompt Engineering (Advanced Techniques), Retrieval-Augmented Generation (RAG), Fine-Tuning, API Integration (OpenAI/Gemini), LLMops Fundamentals, Agentic Workflow Design.
- Data Analysis & Visualization: Statistical Analysis, Exploratory Data Analysis (EDA), Data Wrangling/Munging, Data Visualization (Reporting and Dashboards).

INTERPERSONAL & ENTREPRENEURIAL SKILLS

- Problem Solving: Analytical and critical thinking applied to complex data challenges and real-world scenarios.
- Technology & Innovation: Proactive research and synthesis of new technology trends, rapid learning of emerging AI tools.
- Project Management: Ability to manage self-directed projects, rapid prototyping, and cross-functional communication.

PROGRAMMING LANGUAGES & TOOLS

- Languages: Python (Advanced Proficiency), R (Familiarity), SQL (Database Management).
- Libraries: Python: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn.
- API : google gemini , open AI , Ollama

EDUCATION

Bachelor of Technology in Computer Science and Engineering | 2026-2028

IIIT Bhopal

- Relevant Coursework: DBMS , OOPS , DSA
- GPA: 7.66

XII (RBSE) | 2022-2023

Sanskar a valley of education , Rajasthan

- percentage - 92.0 %

PROJECTS

Project Sentinel: Personalized Document Wallet (Prototype Ready)

- Technologies: Prototype Development (MVP), Figma (UI/UX Design), Authentication Services, Cloud Storage/Database, Security Protocols.
- Developed the complete user interface and basic workflow for both the website and mobile application, utilizing Figma for high-fidelity prototyping and design definition.

Website Content Summarizer Tool

- Technologies: Python, Gemini API, Web Scraping (BeautifulSoup/Scrapy), Advanced Prompt Engineering.
- Engineered an automated web-based tool for rapid content analysis, designed to intake long-form articles, documentation, or reports and deliver concise summaries.
- Developed a robust pipeline that leverages Web Scraping for data extraction and integrates the Gemini API for sophisticated, context-aware summarization, significantly reducing research time.
